AARON G. SO

SEPTEMBER 14, 2017

geelon.so@columbia.edu // geelon.github.io // 773.621.9265 // 517 W 113 St. Apt. 25, New York, NY 10025

M.S. computer science student with five summers of experience as researcher. Tutor to peers and elementary students. Inquisitive and compassionate, I work well in teams, learn quickly, and solve problems resourcefully.

// EDUCATION

COLUMBIA UNIVERSITY *Expected August 2017 – December 2018*
Computer Science, M.S. Machine Learning Track
Relevant courses: *Learning Theory, Information Theory, Algorithms through Geometric Lens, Neural Networks and Deep Learning, GIS/Spatial Analysis (TA)*

THE UNIVERSITY OF CHICAGO *September 2013 – June 2017*
Mathematics, B.S. with Honors GPA 3.56, Dean's List

// EXPERIENCE

UChicago Research Internship (Computer Science Department) *Summer 2016*
- Developed a novel formulation of machine learning inspired by physics, topology, and algebra.
- Presented at the UCISTEM Undergrad Symposium: *A type-theoretic approach to unsupervised learning.*

Nonprofit Consulting Course (UChicago campusCatalyst) *Spring 2016*
- Teamed up with four other students to provide pro bono consulting for a local nonprofit lacking funding.
- Designed an impact assessment model projecting immediate and long-term cost savings and benefits.
- Produced best practices for translating impact statistics into a compelling fundraising strategy.

NSF-REU at UChicago in Mathematics (Research Experience for Undergraduates) *Summer 2014, 2015*
- Researched and wrote expository papers on (1) dynamical systems, with focus on symbolic dynamics, and (2) the mathematics of quantum computing and Shor's algorithm.
- Attended courses ranging over: topology, geometry, logic, graph theory, linear algebra.

// ACTIVITIES

Freelance Machine Learning Journalist *July 2017 – present*
- Researched and wrote articles on machine learning for data science blogs. Articles include the theory and applications of word embeddings. Upcoming: topological data analysis, theory and practice.

Computer Science and Math Tutor/Grader, UChicago *Autumn 2014, Autumn 2016 – Winter 2017*
- Graded for Honors Intro to Computer Science I, and Intro to Computer Science II (languages: Haskell, C)

Alpha Phi Omega, Service Fraternity (Secretary, Winter 2015 – 2016) *Spring 2015 – Spring 2017*
- Devoted the bulk of volunteer activities to tutoring elementary school students in South Side Chicago through the Friends of Washington Park organization.
- Discovered that it is actually quite hard to teach young children even basic multiplication.

Accenture/Ronald McDonald House Consulting Case Competition, UChicago *Winter 2015*
- Led a team of five in a UChicago-wide competition; created a collaborative team dynamic that played to the unique strengths of each member; won 2nd place out of 16 teams.

// SKILLS & INTERESTS

TECHNICAL: Python, C, Haskell, Idris, Linux, Bash, Git, LaTeX, HTML/CSS

LINGUAL: Spanish (proficient, reading and writing), Cantonese (intermediate, spoken), Mandarin (basic)

GENERAL: Self-motivation, teamwork, conflict resolution, creativity, writing

PERSONAL: Piano, chorus, swimming, running, reading, pursuing human freedom
